~ A new generation of power wheelchairs ~

Foldable

Compact

Lightweight

A new level of mobility

The market's smartest power wheelchair

Eloflex is a completely new generation of power wheelchairs with a host of unique features. The exceptionally low weight makes it easy to carry, fold and load. In one seamless action, it compresses into a compact space that's ideal for storing at home or in a car. Equipped with long-lasting batteries and two powerful state-of-the-art motors, you can also drive it for more than 30 km without having to recharge the batteries.

Due its smart and compact design, Eloflex is a more convenient alternative to more bulky manual wheelchairs. You can easily navigate around in shops and crowded places. No need to worry about taking up too much space in restaurants or cafes or even entering a standard toilet.

Models

Eloflex electric wheelchairs come in two different sizes, with variations in height being the biggest difference. Our M-Plus model is ideal for shorter users while our best-selling L and L Plus models are well suited for average to taller users. All chairs work equally well indoors and out.

Our models are available in the Plus version. These are equipped with larger air-filled rear wheels and powerful motors for outdoor use in natural terrain or on uneven or snowy surfaces.

All models feature a robust, lightweight aluminum frame. They also come with high-tech batteries and powerful brushless motors for long-range use and can all be folded in one simple operation.

There's an Eloflex solution for every type of user – young, old, strong or weak. The whole idea is to give you more freedom and less dependency on others.

Application

It's easy to understand how an Eloflex can have a positive impact on people's everyday lives.

Lightweight, electric and collapsible, it overcomes many of the obstacles associated with standard electric chairs and opens up a range of new possibilities. In the past, transporting a traditional wheelchair was next to impossible since they weigh between 80-150 kg and are not foldable.

With its compact design and the high driving comfort, Eloflex places no limits on your travel goals. Easily maneuverable around the park, in town, stores, cafés or restaurants, it empowers you to take charge of the situation. No wider than regular manual wheelchair, you can squeeze into small spaces, toilettes and through narrow doors – something that was

previously impossible with your electric scooter or traditional power wheelchair. In short, a versatile and lightweight electric vehicle for all.

This power wheelchair is aimed to all users. Active wheelchair users seeking an additional smooth power wheelchair. Older people who want the freedom to move themselves. Weaker wheelchair users who can not operate a manual wheelchair.

Perfect to load in the car, take to work, on the go or when visiting friends and family in another part of the country. Eloflex will become a part of your active life. Eloflex is freedom on wheels.

Foldable in five seconds

Features

Every Eloflex wheelchair is a small wonder in itself – a special combination of advanced engineering, new technology and smart materials designed to give you optimal mobility and freedom. All chairs are built on a lightweight and robust aluminum frames. The precision is high, resulting in superior stability and ride comfort. The clever folding design makes the chair extra user-friendly and flexible, while the compact

build ensures that you can get around as easily as with a manual wheelchair.

In the folded position, Eloflex is as small as an ordinary suitcase. It also weighs no more than 26 kg, making it easy to bring along on trips. Regardless of whether you're planning to travel with your own car, take a flight or enjoy a bus ride with friends, your Eloflex can always come along.

This is what makes Eloflex unique:

- Low weight
- Foldable in seconds
- Modern technology
- Compact size
- Long range
